

Yeonsu Kwak

512 Scotland Dr, Newark, DE | fiske@udel.edu | +1 (302) 661-5002 | [linkedin.com/in/yeonsukwak](https://www.linkedin.com/in/yeonsukwak)

EDUCATION

Ph.D. Candidate in Chemical & Biomolecular Engineering Aug 2021 – Nov 2026 (Expected)
University of Delaware (UD), Newark, DE, United States

M.S. in Energy Sep 2016 – Aug 2017
Texas A&M University (TAMU), College Station, TX, United States

B.S. in Chemical Engineering Mar 2012 – Aug 2016
Pohang University of Science and Technology (POSTECH), Pohang, South Korea

RESEARCH INTERESTS

Heterogeneous catalysis and reaction engineering | Electrified and intensified chemical manufacturing
Hydrogen and low-carbon process systems modeling | Catalytic upcycling of biomass and plastics

RESEARCH EXPERIENCE

Postdoctoral Researcher (Incoming) Late 2026
National Laboratory of the Rockies (NLR) (Host: Dr. Gregg Beckham)

Graduate Research Assistant Aug 2021 – Nov 2026 (Expected)
University of Delaware, Newark, DE, United States (Advisor: Prof. Dionisios G. Vlachos)

- Synthesized PtSn/SiO₂ catalysts and demonstrated coke-resistant microwave propane dehydrogenation (PDH) without H₂ co-feed, with higher energy efficiency and slower nanoparticle sintering than furnace heating
- Quantified the linear scaling of dielectric loss with oxygen-vacancy concentration in reduced rutile TiO₂ and related microwave absorption to reduction kinetics and reverse water-gas shift performance using operando dielectric and spectroscopic measurements
- Used rapid pulsed Joule heating to intensify methane coupling while suppressing coke and aromatic byproducts relative to continuous heating
- Integrated CFD, kinetic modeling, and experiments to design an internally Joule-heated ethane cracker with enhanced ethylene yield, projected lower capital requirements, and reduced CO₂ emissions

R&D Intern 05/2026 – 08/2026
Linde Engineering America, Tonawanda, NY (Managers: Dr. Monica Zanfir & Dr. Troy M. Raybold)

- Developed a hybrid equilibrium-kinetic model that defines the thermodynamic over-reduction boundary of Fe₃O₄ water-gas-shift catalysts and predicts hydrocarbon slip from finite-rate methanation and Fischer-Tropsch reactions
- Developed a UniSim blue-hydrogen flowsheet and evaluated reformer and shift configurations to quantify H₂ recycle, carbon intensity, heat integration, and process-design trade-offs

Visiting Scholar Jun 2024
ITACA Institute, Universitat Politècnica de València, Spain (Host: Prof. José M. Catalá-Civera)

- Developed perturbation-based dual-mode cavity protocols to quantify microwave heating profiles and dielectric properties for operando catalysis studies
- Coordinated ITACA-UD dual-mode cavity co-development, international shipment and customs, and preparation for XAS-compatible microwave experiments at QAS, BNL

Visiting Scholar Nov 2022
INMA Institute, University of Zaragoza, Spain (Host: Prof. Jesús Santamaría)

- Conducted cross-laboratory experiments to verify the reproducibility of microwave-assisted PDH performance

Research Scientist (Alternative Military Service) Nov 2019 – Aug 2021
Korea Institute of Science and Technology (KIST), Seoul, South Korea

- Advanced LOHC dehydrogenation systems from catalyst benchmarking to low-platinum-loading catalyst development via atomic layer deposition for scalable hydrogen release

- Designed and constructed Ni-alloy foam architectures for Joule-heated ammonia decomposition reactors
- Scaled an LOHC dehydrogenation reactor to 2.3 Nm³ hr⁻¹ H₂ production using phase-change thermal management
- Managed multi-year projects funded by Hyundai Motor Company and National Research Foundation of Korea

Research Engineer (Alternative Military Service)

Aug 2017 – Nov 2019

Institute for Advanced Engineering (IAE), Yongin, South Korea

- Scaled a continuous 5 ton yr⁻¹ sustainable aviation fuel pilot process integrating palm-oil deoxygenation, hydrocracking, isomerization, and distillation to produce jet-fuel-range hydrocarbons meeting ASTM D7566 specifications
- Managed continuous pilot operations, rotating shift schedules, and process-safety procedures

Graduate Research Assistant

Sep 2016 – Aug 2017

Texas A&M University, College Station, TX, United States (Advisors: Profs. Hae-Kwon Jeong & Phanourios Tamamis)

- Synthesized CO₂-capturing amyloid biomaterials via peptide self-assembly and validated CO₂ uptake

ISSUED PATENTS

- Hydrogen extraction reactor and hydrogen extraction process using phase change materials, **US 11,674,068 B2**
- A catalyst for dehydrogenation of LOHCs and method for producing the same, **KR 10-2472412**
- Apparatus for manufacturing eco-friendly transportation fuel and method therefor, **KR 10-2859154**
- Apparatus for separating and producing hydrocarbon fuels, **KR 10-2786950**

SELECTED ORAL PRESENTATIONS

- Rethinking Chemical Reaction Engineering through Electrification, Catalysis Club of Philadelphia (CCP) Monthly Meeting | Student Talk October 2026 (upcoming)
- Process Electrification for Scalable and Intensified Chemical Manufacturing, KAIST YGIS, Korea 2026
- Dynamic Electrification of Nonoxidative Propane Dehydrogenation, NAM29, GA 2025
- Electrified Biogas Upgrading into Value-Added Chemicals, AIChE Fall, CA 2024
- Mechanistic Insights into Microwave-Assisted Thermal Catalysis, 5GCMEA, Japan 2024
- Microwave-Assisted Direct Propane Dehydrogenation, AIChE Fall, FL & NAM28, RI 2023
- Electromagnetic field driven catalysis for electrification, ACS Spring, Hybrid 2023

AWARDS & HONORS

- Theodore A. Koch Graduate Student Travel Award | Catalysis Club of Philadelphia (CCP) 2026
- NSF Delaware EPSCoR Graduate Bridge Fund Award 2025 – 2026
- Best Oral Presentation Award | 5th Global Congress on Microwave Energy Applications (5GCMEA) 2024
- AIChE Hanwha Travel Award | Hanwha Solutions & TotalEnergies Petrochemical 2024

- Graduate Student Travel Awards | UD Graduate College & UD CCST 2024 – 2025
- Commendation for Oral Ph.D. Qualifier Exam (Exceptional) | UD ChBE 2022
- Finalist, Fulbright Graduate Scholarship | U.S. Department of State & Fulbright Korea 2021
- Master of Science in Energy Scholarship | Texas A&M Energy Institute 2017
- Global Engineers Fostering Scholarship (M.S. Full Funding) | EDRC of Seoul National University 2016 – 2017
- National Scholarship in Science and Technology (B.S. Full Funding) | Ministry of Education of Korea 2012 – 2016
- 4th Place Award, Korea Chemical Process Simulation Olympiad | KICChE, Schneider Electric 2016
- Research Scholarship for Undergraduate Research Program | POSTECH 2015
- Exchange Student Scholarship (National University of Singapore, Fall 2015) | POSTECH 2015
- Exchange Student Scholarship (Nanyang Technological University, Summer 2014) | POSTECH 2014

SERVICE & LEADERSHIP

Peer Reviewer | American Association for the Advancement of Science, American Chemical Society, Royal Society of Chemistry & Elsevier 2022 – Present

- Completed 40+ peer reviews for Science Advances, ACS Catalysis, Chemical Engineering Journal, Fuel, International Journal of Hydrogen Energy, Catalysis Today, Molecular Catalysis, ACS Omega, Journal of Alloys and Compounds, RSC Advances, and Fuel Processing Technology

Research Mentor | UD Delaware Energy Institute 2023 – Present

- Auden Jones ('24-'25): Microwave catalysis of metal oxides; admitted to the University of Houston's Ph.D. program
- Matthew Conlon ('23): Microwave heating of carbon materials; admitted to Purdue's Ph.D. program

President ('23-'24), Treasurer ('22-'23) | UD Korean Graduate Student Association 2022 – 2024

- Managed annual finances exceeding \$3,000 and organized 10+ academic and community events, serving 100+ members of the UD Korean and Korean-American community

Teaching Assistant | UD ChBE 2023

- CHEG614/814 (Special Topics in Energy, Spring), Instructor: Prof. Dionisios G. Vlachos. Led office hours and facilitated graduate-level discussions on energy systems
- CHEG445 (Chemical Engineering Lab II – Distillation, Fall), Instructor: Prof. Nicholas Shevchenko. Supervised distillation pilot plant operations and graded technical reports for 30+ seniors, adhering to safety protocols

PROFESSIONAL MEMBERSHIP

- Catalysis Club of Philadelphia (CCP), Graduate Student Member 2024 – Present
- American Institute of Chemical Engineers (AIChE), Graduate Student Member 2022 – Present
- Korean-American Scientists and Engineers Association (KSEA), Graduate Student Member 2022 – Present
- Korean Institute of Chemical Engineers (KICChE), Regular Member (on leave) 2017 – Present
